

The **BOMAR DEBURRING** machines are the perfect complement to our sawing machines.

The **BOMAR Basic 200** is a simple table-top machine for manual deburring of saw-cut pieces. The special wire brush that rotates with 2,800 RPM ensures excellent results, clean and burr-free parts. Even tubes can be cleaned inside and outside.

Technical Data	
Brush dimensions	7.87" x 1.57"
Nominal RPM	2800
Voltage	3 x 230V / 1 x 230V

The **BOMAR Singel 250** is a machine for manual deburring of saw-cut pieces. The special wire brush that rotates with 2800 RPM ensures excellent results, clean and burr-free parts. Even tubes can be cleaned inside and outside

The machine comes with a pedestal and offers ideal working height. Chips and dust from the deburring operation are collected inside of a drawer located on the bottom of the pedestal.

Technical Data	
Brush dimensions	9.84" x 2.17"
Nominal RPM	2800
Voltage	3 x 230V

The **BOMAR Orbital 250** is a semi-automatic deburring machine.

Due to the 2-axis rotation of the wire brush tubes are cleaned inside and outside without rotating the material. The machine offers a 2-speed drive for optimum result for different materials.

Chips and dust from the deburring operation are collected inside of a drawer located on the bottom of the pedestal.

Technical Data	
Brush dimensions	9.84" x 7.48"
Nominal RPM	3000 / 1420
Voltage	3 x 230V
